- Professional Scrum Master™ I (PSM I)
- Microsoft Certified: Dynamics 365 Fundamentals (CRM)
- Microsoft Certified: Azure Fundamentals

LANGUAGES

French · Native
English · Fluent
Dutch · Intermediate

PROFILE

Product Manager in private banking, fluent in both languages spoken in the room: business and IT. After three years in a **Big 4**, I now own two **digital products**: the bank's **CRM**, and the client platform behind its execution-only and discretionary mandates, where **AML**, **MiFID** and **user experience** all have to meet. Solvay graduate with a full-stack developer background, I turn business requirements into backlogs engineers can build, and technical constraints into decisions the business can own.

WORK EXPERIENCE

- Product Manager · Degroof Petercam** 2024 – Present
Product Owner · CRM (Dynamics 365) & Client Lifecycle Management
 - Product Owner of two digital products: the bank's CRM (Microsoft Dynamics 365) and Client Lifecycle Management for the digital investment platform, leading two cross-functional squads of 10+ business, IT and compliance experts
 - Own CLM end to end for execution-only and discretionary mandates, covering onboarding, client data and regulatory questionnaires across the bank's investment product range
 - Built the digital onboarding journey covering AML and MiFID questionnaires, digital identity (itsme) and e-signature in one paperless flow, activating a new client end to end in under 15 minutes
 - Launched self-service CLM, letting clients update their own personal and regulatory data digitally and removing manual back-office maintenance
 - Set the CRM roadmap and backlog priorities for the platform used daily by private bankers and client-facing teams, acting as the single point of translation between business, engineering and risk
- Senior Financial Services Consultant · EY** 2021 – 2024
Banking industry · private banking clients
 - Functional Analyst on a strategic digital transformation for a private bank: gathered business requirements, wrote functional specifications and BPMN process flows, and steered delivery with the IT teams
 - Designed and rolled out the Client Center operating model for the Mass Affluent segment, aligning commercial targets with system and data capabilities
 - AML Analyst across first and second line of defence, bringing hands-on control knowledge into the design of the tooling that supports it
 - Bridged business stakeholders and technical teams on scope, dependencies and testing throughout the delivery cycle
- AML Analyst · Degroof Petercam** 2020 (4 months)
 - SPOC for Private Banking on AML file reviews and source-of-funds analysis, and pushed KYC/KYT process improvements, the operational pain points that shaped my later product work

EDUCATION

- Junior Full Stack Developer · Le Wagon** 2020
9-week intensive program: built and shipped a production web app. *Ruby on Rails, JavaScript, HTML/CSS, PostgreSQL, Git.*
- Master of Management Science · Solvay** 2018 – 2020
Major in econometrics. Thesis: business plan for a unified LMS consolidating the university's digital interfaces, covering financials and rollout strategy.
- Bachelor in Economics · Solvay** 2014 – 2018
Minor in statistics.
